Claims

1. In a carton of the type comprising an open top container and a separate top closure,  
wherein the carton has a carrying handle arrangement for facilitating lifting and  
5 carrying of the carton, the carrying handle arrangement comprising at least one  
reinforced handle of multi-ply construction, wherein at least one ply of the or each  
reinforced handle is provided by the open top container and at least one further ply of  
the or each reinforced handle is provided by the top closure.
- 10 2. The carrying handle arrangement according to claim 1 wherein the ply of the or each  
reinforced handle provided by the open top container being formed from one of side  
walls of the open top container and wherein said one further ply of the or each  
reinforced handle is provided by a handle panel hingedly connected to the top closure.
- 15 3. The carrying handle arrangement according to claim 2 wherein the handle panel  
hingedly connected to the top closure is secured to an inner face of the ply of the  
respective reinforced handle formed from the one of said side walls.
- 20 4. The carrying handle arrangement according to claim 2 or 3 wherein an additional ply  
of the or each reinforced handle is hingedly connected to the respective handle panel.
- 25 5. The carrying handle arrangement according to claim 4 wherein the additional ply of  
the or each reinforced handle is secured to an outer face of the ply formed from the  
one of said side walls.
- 30 6. A carton of the type comprising an open top container and a separate top closure,  
wherein at least one of walls of the open top container has a hinged top flap folded to  
extend downwardly into the open top container, wherein the top closure comprises an  
engaging tab for engaging the top flap such that the engaging tab is disposed between  
the one wall and the top flap, the top closure is disposed in a recessed position below  
an upper edge of the open top container.
